PROFILE

I'm Fouad, a second-year Business Administration student at the University of Mohamed El Bachir El Ibrahimi in Bordj Bou Arreridj, Algeria. My work blends business thinking with hands-on building — I use AI-assisted development (vibe coding) and design tools to ship real projects, not just plan them on paper. My path started with co-founding a student club, where I picked up community management and administrative coordination — and it's since grown into building websites and visual content with AI tools. I'm open to remote, on-site, or internship opportunities where I can apply this mix of business, design, and AI-assisted development.

EXPERIENCE

Co-founder & Communication and Administration Manager

Student Club ECONOVO — Université Mohamed El Bachir El Ibrahimi, BBA | December 2025 — Present

- Designed and built the club's website solo — from layout to content, with no external help.
- Planned and coordinated the club's launch event, gathering 39 participants — managing full logistics, communication, and on-site welcome.
- Created and published visual content on Facebook and Instagram that achieved 4,500 organic views in 24 hours — with zero advertising budget.
- Designed the complete visual identity of the club: logo, brand guidelines, posters, and presentation materials using Canva and PowerPoint.
- Drafted official correspondence addressed to the University Dean to obtain the necessary administrative authorisations.
- Set up a member database via Google Forms connected to Google Sheets, enabling automated tracking of 39+ registrants.

PROJECTS

ECONOVO — Student Club Website

econovo.is-cool.dev

The official website of ECONOVO, the student club I co-founded — designed and built solo to showcase the club's mission, activities, and events to the university community.
